

**Figure 1**

Figure 1 consists of two panels, (a) and (b), showing histograms of the number of non-zero elements in the matrix  $A$ . Panel (a) shows the distribution for  $n = 10^6$ , with the x-axis labeled "Number of non-zero elements" ranging from 0 to 100,000,000 and the y-axis labeled "Frequency" ranging from 0 to 10. The distribution is highly skewed towards zero, with a peak frequency of approximately 9 at 0 non-zero elements. Panel (b) shows the distribution for  $n = 10^7$ , with the x-axis labeled "Number of non-zero elements" ranging from 0 to 1,000,000,000 and the y-axis labeled "Frequency" ranging from 0 to 10. This distribution is also highly skewed towards zero, with a peak frequency of approximately 9 at 0 non-zero elements.
